SAYING

– *AUTHOR*

2.1 Math Env

Theorem 2.1.1 (Pythagorean theorem) This is a right triangle, where a is the length of one of the legs, b is the length of the other leg, and c is the length of the hypotenuse. The Pythagorean theorem is then:

$$a^2 + b^2 = c^2 \quad (2.1.1)$$

2.2.1 minted test

Below is a minted package test:

```

2.2.2 titletoc usage

Some notes about titletoc package usage:

```

\titlecontents{chapter}
[2em]% left margin
{\vspace*{\fill}}
% 1. the above code, in vertical mode
{\contentslabel{1em}}
% 1. hbox of length to put this number, expand to left;
% 2. you can't use '[' in it, just set a new macro.
{}

```

```
% 1. numberless format (usually ignored)
{\hspace*{2em}\contentspage}
% 1. fill page format, in horizontal mode
[]
% 1. after code, in vertical mode
```

Other Item

2.3 layout

Print layout using `\layout` command provided by `layout` package.

2.4 Multicol

If column number ≥ 1 , the `multicol` package will be loaded. **theorem (2.1.1)**.
