## ☆ Outline

1.	Basic	
	► Partial toc	3
	► Graphics	4
	<ul><li>include</li></ul>	
	■ export	
2.	Env Setup	
	► Math Env	6
	► Babel	7
	<ul><li>minted test</li></ul>	
	• titletoc usage	
	► layout	11
	► Multicol	12

# Basic

### ☆ Partial toc

Belo	w is t	he partia	l ta	abl	eof	coi	nte	nts	of	th	is c	ha	pte	r:							
2	Grapl	hics																			4
	2.1	include																			4
	2.2	export																			4
		ECTION-																			

## ☆ Graphics

### 2.1 include

**BUG**:If not Start a newpage: the subsection in this frame is: 2-2.

### 2.2 export

Something in the last page: 12

New Box:Hello world.

# Env Setup

### \* Math Env

**Theorem 1.1 (Pythagorean theorem)** This is a right triangle, where a is the length of one of the legs, b is the length of the other leg, and c is the length of the hypotenuse. The Pythagorean theorem is then:

$$a^2 + b^2 = c^2 (1.1)$$

loaded loaded

#### 2.1 minted test

Below is a minted package test:

```
1 \makeatletter
2 \bool_if:NTF \g__zlatex_slide_bool {
3 \renewcommand\maketitle{
4 \null\vfill\begin{center}
5 \begin{tabular}{c}{\huge\zslideTitle}\\[2em]
6 \zslideAuthor\\[2em]\zslideDate\end{tabular}
7 \vspace{\stretch{2}}\end{center}
8 \thispagestyle{empty}\setcounter{page}{0}
9 \newpage
10 }
11 }{
```

```
\renewcommand{\maketitle}{
12
       \bool_if:NT \g__zlatex_hyperref_bool {\hypersetup{pageanchor=false}}
13
       \newgeometry{margin=1.5in}
14
         \thispagestyle{empty}
15
         \begin{center}\vfill\vspace*{40pt}
16
         \rule{6pt}{77.5pt}
17
18
         \begin{tabular}[b]{1}{\huge\bfseries\@title}\\[5em]{\Large\bfseries\@author}\
         end{tabular}
         \par\vfill{\Large\textcolor{gray}{\@date}}
19
         \end{center}
20
       \restoregeometry
21
       \bool_if:NT \g__zlatex_hyperref_bool {\hypersetup{pageanchor=true}}
22
23
24 }
   \makeatother
```

### 2.2 titletoc usage

Some notes about titletoc package usage:

```
\titlecontents{chapter}
  [2em] % left margin
 {\vspace*{\fill}}
   % 1. the above code, in vertical mode
 {\contentslabel{1em}}
   % 1. hbox of length to put this number, expand to left;
    % 2. you can't use '[]' in it, just set a new macro.
 {}
    % 1. numberless format (usually ignored)
 {\hspace*{2em}\contentspage}
   % 1. fill page format, in horizontal mode
  % 1. after code, in vertical mode
```

## Other Item

Eureka Debug zTEX September 17, 2024 10/12

Print layout using \layout command provided by layout package.

### \* Multicol

If column number >= 1, the multicol package will be loaded. theorem (1.1).

Consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem.
